Interpretation

The model generated the listed handgun and knife observations at the configured confidence threshold. A confidence score describes model certainty and is not an analyst decision. Analyst decisions document a later human assessment and do not replace or delete the original model observation.

Frame numbers are zero-based. Times are video-relative offsets and are not recording dates. Bounding boxes use [x1, y1, x2, y2] source-frame pixel coordinates. Counts represent frame observations, so the same physical object may appear more than once.
